EDUCATION

PhD	University of Pennsylvania, Philadelphia, PA School of Social Policy and Practice Dissertation: <i>Essays on the Social Impact of Philanthropic and Government Grantmaking</i> Committee: Femida Handy (Chair), Chao Guo, Rand Quinn	Current
MPP	University of Minnesota, Minneapolis, MN Humphrey School of Public Affairs	2022
BA / MA	Korea University, Seoul, Republic of Korea Department of Public Administration	2019

RESEARCH INTERESTS

I study how public and private funding shape the creation of social impact, focusing on the distinct roles each plays. My work examines how government agencies and philanthropic organizations decide where to direct resources, and how these choices influence their capacity to generate meaningful change. My research draws on organizational theory and uses both traditional causal inference methods and computational text analysis techniques, including Large Language Models.

Topic Nonprofit and Public Management | Social Impact Measurement | Organizational Theory

Method Causal Inference | Computational Social Science

DISSERTATION

My dissertation tackles a fundamental question in the grantmaking ecosystem: how do government and philanthropic funding decisions translate into real-world social change? Across three interconnected studies, I examine the mechanisms through which these actors generate social impact. The first essay analyzes whether concentrating grants among fewer nonprofits versus distributing funding more broadly relates to different societal outcomes. The second essay investigates the organizational and institutional conditions that lead private foundations to support progressive social movements. The third essay examines strategies public foundations use to increase public donations and strengthen their funding base. This project has been supported by several competitive fellowship programs, including the Oxford-Penn Social Impact Fellowship Program and the Stanford Philanthropy and Civil Society Junior Scholars Forum.
